PROFILE

Results driven professional with a focus on **senior-level** roles in **Full Stack / MERN Stack Development** and **Frontend / React Development** within a reputable organization. Possessing over **4 years** of experience in the Software Development and Service Industry, adept at end-to-end planning and implementation, with a strong grasp of scope management concepts.

SKILLS

React JS	NodeJS	Javascript	Typescript	NextJS	Redux	MongoDB	Agile	AI
Project Management	Web Design	Micro-frontend	Deployment	AWS	Testing	Git		

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer

05/2024 – present | Pune, India

top.legal 🔗

- Built and improved features for an **AI driven Legal Tech** platform using **React, Node.js, TypeScript**, and **GraphQL**, making contract negotiations faster and easier for users.
- Optimized performance and data handling by integrating **Elasticsearch** for better search and data management capabilities.
- Designed** and implemented cost-effective **serverless** solutions leveraging **AWS**, ensuring high scalability and reliability.
- Guided and supported team members, promoting **best practices** and contributing to a collaborative work environment.
- Designed and maintained **reusable**, scalable UI components using **Storybook**, improving development efficiency.

Senior Solution Engineer

05/2022 – 05/2024 | Pune, India

Decode Solutions 🔗

- Worked in using **ReactJS** and **NextJS** with **Typescript** and **Redux** for building rich internet applications.
- Contributed to dashboard service with success rate out of **100%**, enabling users to monitor and **execute** command operations on cloud services like **AWS, Google Cloud, Azure**, etc.
- Expertise in **debugging** and **troubleshooting** existing codebase with industry standard **solutions**.
- Collaborated** closely with developers to conceptualize and construct resilient solutions, ensuring alignment with product requirements for **functionality, scalability, and performance**.
- Demonstrated** a strong commitment to writing clean, readable, and maintainable by coding **standards** and **best practices**.

Software Engineer

03/2021 – 05/2022 | Bengaluru, India

DIATOO Software Solutions 🔗

- Led the design and development of a **role-based stock management dashboard**, incorporating advanced notification management and user authentication modules.
- Implemented a secure **authentication and authorization system** using **Node.js**, and **JWT**, ensuring robust data protection.
- Gained hands-on experience in **Agile** workflows, and **DevOps** practices, to enhance development efficiency and durability.

PROJECTS

AI Driven Legal Tech Platform - German

05/2024 – present

top.legal

About: **AI-enabled SaaS** platform transforms how businesses negotiate contracts by combining sales enablement with legal automation. Empowers decision-makers to close better deals faster through intelligent and automated contracting solutions.

Key Contribution:

- Designed and implemented advanced features using **React, Node.js**, and **TypeScript** to enhance **experience** and **scalability**.
- Built a serverless pipeline leveraging **AWS** services like **DynamoDB** and **Lambda**, enabling efficient, real-time processing.
- Integrated **Elasticsearch** to enhance search functionality and data relationships, improving customer insights and efficiency.
- Actively mentored junior engineers, ensuring quality and fostering a **collaborative** team environment.

Tech Stack: ReactJS, TypeScript, NodeJS, GraphQL, DynamoDB, Elasticsearch, AWS Lambda, Storybook, Git, GitHub Copilot.

EDUCATION

Bachelor of Computer Application

07/2017 – 06/2020 | Pune, India

Tilak Maharashtra Vidyapeeth, Pune
